

The 100% luxembourgish **digital**  
**health solution designed**  
**for all healthcare professionals**

[bloobizmedical.lu](http://bloobizmedical.lu)

# The all-in-one digital solution dedicated to all healthcare professions

**Bloobiz Medical** is an **all-in-one cloud solution** developed in Luxembourg to meet the real needs of healthcare professionals. It centralizes **all essential features on a single platform**. This includes consultation management, patient records, logistics, and administrative tasks. With an intuitive interface and **full compliance with regulatory requirements**, **Bloobiz Medical simplifies your daily operations**.

- |   |  |
|---|--|
|  Doctors                   |  Home care services                 |
|  Paramedical professionals |  Nursing homes and retirement homes |
|  Private nurses            |  Prevention centers                 |
|  Nursing assistants        |  Multidisciplinary practices        |
|  Caregivers                |  Medical-social associations        |

# A smart digital solution for today's healthcare challenges

**Bloobiz Medical** stands out with its **advanced features** that centralize your core activities and **automate your daily operations**.

**Save time** by reducing manual tasks with **simplified patient record organization**, **automatic report generation**, and **integrated appointment management**. Given the complexity of coordinating patients and resources, Bloobiz Medical offers a **modular and interconnected ecosystem** to optimize your schedules and improve the efficiency of your consultations.

## HEALTH RECORDS MANAGEMENT

- **Quick and centralized** access to your patients' records ;
- **Secure archiving** of medical images (X-rays, scans, etc.) ;
- **Comprehensive tracking** of medical history, observations, diagnoses, and prescriptions.

## CONSULTATION COORDINATION

- **Management and scheduling** of consultations based on a calendar of available resources and services ;
- Smart booking feature that **synchronizes schedules in real time** and **sends confirmations and reminders**.

## MEDICAL REPORT GENERATION

- **Automatic creation** of consultation and diagnostic reports ;
- Prescriptions integrated with the **CNS standard**.

## BILLING AND FEE STATEMENT MANAGEMENT

- **Simplified billing:** Integration of **RA/PID** for smooth payments and reimbursements ;
- **Automation:** Automated generation and submission of fee statements to the **CNS**, with quick feedback on rates and actual amounts.

## WAITING ROOM MANAGEMENT

- **Real-time monitoring** of patients in the waiting room ;
- **Automatic notifications** to inform patients when it's their turn to enter the consultation room.

## INTERACTIVE RECEPTION DESK

- **Self-check-in:** patients confirm their appointment or scan their health insurance card upon arrival ;
- **Immediate integration:** data is transmitted to the ERP and the patient automatically shows up in the virtual waiting room.

## INTEROPERABILITY

**Bloobiz Medical** connects directly with national platforms such as **E-santé** and **CNS**, ensuring seamless data synchronization.

# Patient Record 2.0: Optimized management and shared access

**Bloobiz Medical** enables **smooth and centralized management** of patient records, making medical data easily accessible for every consultation. With a single click, you can access **the patient's full medical history**, allowing you to monitor their health progress and prescribe appropriate care.

## PATIENT'S HEALTH CONDITION

Get an **instant clinical overview** of medical history, allergies, treatments, vaccinations, and chronic conditions. A clear picture **that helps with diagnosis**, prepping for appointments, and guaranteeing continuity of care..

## CONSULTATION MONITORING

View a **complete history** of patient visits, medical records and documents (X-rays, prescriptions, fee statements, etc.).

## AUTOMATIC PRESCRIPTION GENERATION

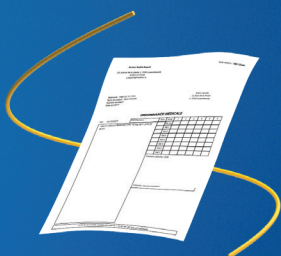

Simplify the prescription process with **automatically generated prescriptions** that **comply with national standards**.

## FULL PATIENT MONITORING TRACEABILITY

Access each **patient's full history chronologically** : consultations, examinations, treatments, and appointments. A powerful tool for informed clinical decisions

Focus on  
your **patients' care**,  
we take care of the rest.

## Simplified sharing with the DSP (Electronic healthcare record)

**Bloobiz Medical** simplifies information exchange between healthcare professionals and their patients through integration with the **Electronic Health Record (DSP)**.

With a single click, make patients' medical documents visible in the DSP. This feature ensures continuity of care and smooth collaboration between healthcare professionals, while complying with **E-Santé** system security standards and data confidentiality regulations.

# Booking Manager: a smart medical calendar for assisted appointment management

Booking appointments can be time-consuming; **Bloobiz Medical's Booking Manager** automates and simplifies this process. By optimizing schedule and resource management, it maximizes all available time slots to maintain a **steady flow of consultations**. This helps **reduce patient wait times** and enhances their experience at your facility.

## Online appointment booking

- **Simplified online reservation** for your patients with real-time display of available slots based on doctors' and resources' availability (doctors, consultation rooms, equipment, nursing staff) ;
- **Automatic confirmation and reminders sent** via SMS and/or email (according to your preferences) to minimize no-shows ;
- Patients can reschedule appointments directly **through your website**.

## Resource Management

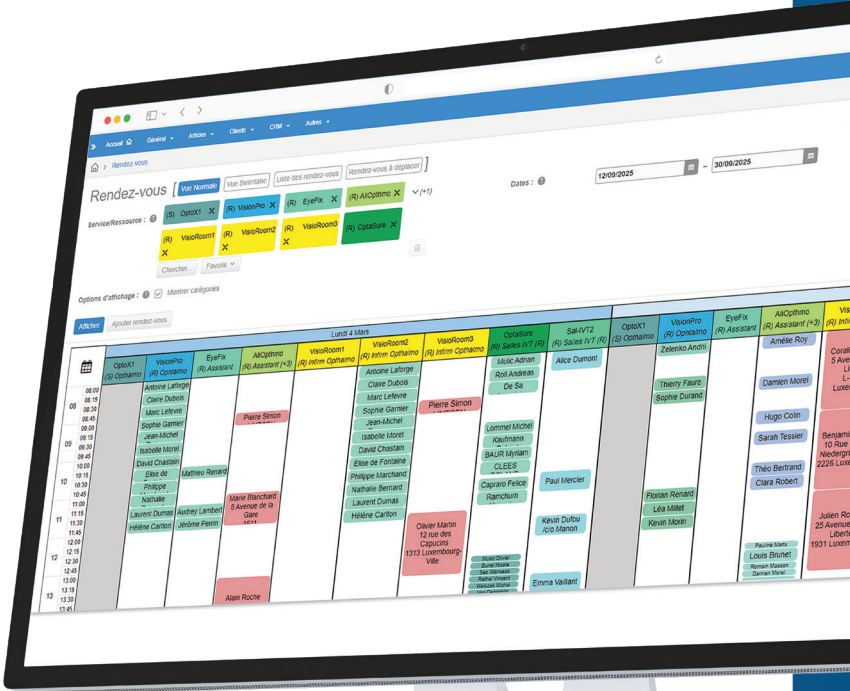

- **Real-time scheduling** of fixed resources (e.g., operating rooms, consultation booths, machines) and human resources (e.g., doctors, medical assistants) ;
- **Availability display for each doctor**, nurse, or specialist, with the ability to block time slots based on required resources (machines, equipment).

## Schedule Synchronization

All schedules are **synchronized in real time**, ensuring seamless coordination of availability between doctors, equipment, and patients.

Simplify your consultation management with an **all-in-one platform** designed to optimize scheduling.

# Bloobiz Medical:

## More than software, a complete solution for your facility

**Bloobiz Medical** goes beyond healthcare management. Featuring reliable administrative modules, it helps you manage your employees, suppliers, and finances while ensuring compliance with regulatory standards. **Bloobiz Medical** offers you a fully integrated solution.

### EMPLOYEE MANAGEMENT (HRM)

Track working hours, absence management, leave days, and payroll.

### INVENTORY AND EQUIPMENT MANAGEMENT

Monitor medical equipment and consumable supplies in **real time** to schedule timely restocking.

### SUPPLIER MANAGEMENT

**Simplify your supplier relationships**, from ordering to delivery and invoicing.

### FORMS

**Create and customize forms** to efficiently collect patient information and **automate administrative processes**.

### BLOOBIZ MAIL

**Manage all your professional emails** from an integrated ERP mailbox. Collaborative communication is supported by tracking statuses (unread, in progress, processed) and full traceability indicating which staff member has processed each message.

### BLOOBIZ CHAT

Use the internal messaging system for instant, **secure communication between team members**, making coordination and information sharing easier.

### CLOCKING

Monitor employee check-in and check-out times for **accurate work time management** and better resource planning.

### DOCUMENT MANAGEMENT SYSTEM (DMS)

Store all types of **files centrally**. Set retention dates for sensitive documents with automated reminders. The **system alerts** you when retention periods are about to expire.

### CLICK TO CALL

Call your patients with a **single click from their chart thanks to the built-in PABX module**, Luxembourg Online's phone exchange system. The "Call" button **launches the call directly**, no dialing required, and the patient chart opens automatically for incoming calls.

# Switch to Bloobiz Medical today

As a healthcare professional, you deserve a solution that lets you focus on what matters most. **Bloobiz Medical** relieves you from administrative and logistical burdens with a **flexible, secure platform** offering **seamless interoperability** with **state systems such as E-Santé and the CNS**.
